VersaRent

Property Owner Dashboard — Phased Development Roadmap & Third-Party Integration Guide

Platform: Expo Go (SDK 56) · React Native · TypeScript

Backend: Supabase (Auth · PostgreSQL · Realtime · Edge Functions)

Last updated: June 28, 2026

Phases: 0 – 5 (Foundation → Growth)

Expo SDK 56

React Native

TypeScript

Supabase Auth

PostgreSQL

Supabase Realtime

Edge Functions

EAS Build

01 Product Overview

VersaRent is a mobile-first property-owner dashboard built for landlords and property managers. A single authenticated user manages their entire portfolio: properties, units, tenants (clients), rent and utility transactions, and direct messaging — all in one app backed by Supabase.

There is no tenant-facing login today. Tenants exist as database records (`profiles.role = 'tenant'`) linked to units via `units.tenant_id`. A lightweight tenant self-service portal is planned for Phase 4.

Current Technology Stack

Layer	Technology	Purpose
Mobile client	Expo SDK 56 · React Native · TypeScript	Cross-platform iOS & Android app
Auth	Supabase Auth (Email, Google, Facebook, Twitch)	Sign-in, session persistence, OAuth
Database	Supabase PostgreSQL + Row Level Security	All application data, owner-scoped access
Realtime	Supabase Realtime	Live chat and dashboard updates
Storage	Supabase Storage (planned)	Property photos, avatars, documents
Automation	Supabase Edge Functions + <code>pg_cron</code>	Scheduled reminders, webhooks, notifications
Build	EAS Build (planned)	App store submissions

Core Data Model

Table	Purpose	Key Columns
<code>profiles</code>	Extends <code>auth.users</code>	<code>role</code> , <code>phone</code> , <code>bio</code> , <code>unit_id</code> , <code>expo_push_token</code>

Table	Purpose	Key Columns
properties	Buildings owned by owner	owner_id, name, address, type, image_url
units	Rentable spaces	property_id, tenant_id, lease_start, lease_end, monthly_rent
transactions	Rent, water, repair charges	unit_id, amount, category, status, due_date
messages	Owner ↔ tenant chat	chat_id, sender_id, content, created_at
maintenance_requests	Tenant-reported issues (new)	unit_id, title, priority, status, photo_url
maintenance_schedules	Owner-planned recurring maintenance (new)	property_id, title, recurrence, next_due_date
notifications	In-app alert centre (new)	owner_id, type, title, body, read, related_id

Development Phases

The roadmap is divided into six phases. Each phase builds on the last and ships a coherent, usable increment of the product.

Phase	Name	Focus	Status
0	Foundation	Core CRUD, auth, navigation, dashboard	In Progress
1	Core Gaps	Unit management, client assign, transaction CRUD	Next
2	Reminders & Alerts	Payment pings, maintenance alerts, push & SMS	Planned
3	Financial & Reporting	Charts, exports, lease tracking, payment gateway	Planned
4	Tenant Portal	Read-only tenant view, maintenance requests	Future
5	Production & Growth	EAS Build, CI, error tracking, analytics, e-sign	Future

PHASE 0

Foundation — Core App (In Progress)

Active

Everything already built and working. The app is functional for a single owner with pre-seeded demo data. This phase closes all remaining PARTIAL items before moving to Phase 1.

- ✓ Email / password sign-in & sign-up
- ✓ Auto owner role + profile bootstrap
- ✓ Properties list + add property modal
- ✓ Realtime owner ↔ client chat
- ✓ Row Level Security on all tables
- ~ Trend percentages (static → real calc)
- Pull-to-refresh on all list views
- Bottom tab bar navigation
- ✓ Google, Facebook, Twitch OAuth
- ✓ Dashboard: stat cards, property gallery
- ✓ Transactions ledger + add transaction
- ✓ Owner profile: name, phone, bio
- ✓ Dark theme + branded UI primitives
- ~ Avatar from OAuth metadata (→ upload)
- Loading skeletons
- Seed sample client profiles

No new services required. Phase 0 completes using only the existing Supabase stack.

Core Gaps — Full CRUD & Client Management

[Next Up](#)

Closes all major gaps that leave the app half-functional: units cannot be managed from the app, clients cannot be assigned, and transactions cannot be edited. This phase makes VersaRent usable on real data without touching the Supabase Table Editor.

Unit Management

- Add unit from property detail panel
- Edit unit (number, floor, status)
- Delete unit with confirmation
- Cascade delete units + transactions when property deleted

Client (Tenant) Management

- Assign client to unit (set tenant_id)
- Unassign client from unit
- Client detail: name, phone, email, unit
- Invite flow: create tenant profile + assign unit

Transaction Improvements

- Edit transaction (amount, status, due date)
- Delete transaction with confirmation
- Filter by category, status, property
- Search transactions by unit or tenant name
- Export to CSV

Property Improvements

- Edit property details (name, address, type)
- Supabase Storage upload for cover photos
- Avatar upload (Supabase Storage)

Messaging Improvements

- Unread message count badge on nav item
- Last message preview in contact list
-

Broadcast message to all tenants of a property

New Services Introduced in Phase 1

Service	Purpose	Cost
Supabase Storage	Property cover photo upload, avatar upload	Free (1 GB included)

PHASE 2

Reminders & Alerts — Owner Pings & Maintenance Notifications

Planned

This phase gives the owner every channel needed to remind tenants of payments and stay on top of maintenance. All channels either cost nothing or pennies at small tenant counts.

Payment Reminder Channels

In-App Chat Shortcut

Free

A "Send Reminder" quick-reply button in ChatView pre-fills a message with the tenant's outstanding amount and due date. Writes to the existing messages table — zero new infrastructure.

WhatsApp Deep Link

Free

Owner taps "Send via WhatsApp" on any tenant or transaction row. Opens native WhatsApp with a pre-filled message. No API key — uses `Linking.openURL` with `wa.me`. Works in Expo Go today.

Push Notification (manual)

Free

Owner taps bell icon beside a tenant. Triggers a Supabase Edge Function that calls the Expo Push API. Tenant device receives a native push. Requires storing `expo_push_token` in profiles.

Email Reminder (manual)

Free ≤ 3k/mo

Owner triggers a branded HTML email via Resend. Shows tenant name, property, unit, amount due, and an optional personal note typed by the owner. Called from a Supabase Edge Function.

SMS Reminder (manual)

~\$0.008/SMS

Owner triggers an SMS via Twilio to the tenant's `profiles.phone`. Message includes property name, unit, amount, and due date. Credentials stored as Supabase secrets — never in the app.

Scheduled Auto-Reminders

Free

`pg_cron` runs daily at 8 AM. Finds transactions due in 3 days → fires push + email automatically. Also auto-flips `PENDING` → `OVERDUE` after due date passes. No owner action required.

Maintenance Alert System

Maintenance Schedules

Free

Tenant Maintenance Requests

Free

Owner creates recurring maintenance items (annual inspection, quarterly pest control). New `maintenance_schedules` table. `pg_cron` alerts owner when `next_due_date = today` via push + in-app notification.

Tenant submits a request (title, description, photo). Database Webhook fires Edge Function → writes to `notifications` table + sends owner a push: "Unit 3B: Leaking tap reported." Owner sees it instantly via Realtime.

In-App Notification

Free

Centre

Bell icon in app header with unread badge. All automated events (overdue rent, maintenance due, lease expiry) write a row to the `notifications` table. Supabase Realtime updates the badge live without polling.

Lease Expiry Alerts

Free

`pg_cron` runs weekly and notifies owner when any unit's `lease_end` is within 30, 14, or 7 days. Delivered as push notification and in-app notification row. Requires adding `lease_start` / `lease_end` columns to `units`.

New Services Introduced in Phase 2

Service	Purpose	Free Tier	Paid
Expo Push Notifications	Native push to tenant devices	Unlimited (Expo limits)	—
Resend	Branded HTML email reminders	3,000 emails/month	\$20/mo for 50k
Twilio SMS	SMS rent reminders	—	~\$0.0079/SMS
pg_cron (Supabase)	Scheduled jobs: auto-overdue, auto-remind	Included in Supabase	—
Supabase Database Webhooks	Trigger Edge Function on table events	Included in Supabase	—

```
-- pg_cron: daily job to auto-mark overdue transactions
SELECT cron.schedule( 'mark-overdue-daily', '0 8 * * *', $$ UPDATE transactions SET status = 'OVERDUE' WHERE status = 'PENDING' AND due_date < CURRENT_DATE; $$ );
```

PHASE 3

Financial & Reporting — Analytics, Exports, Payments

Planned

Transforms VersaRent from a data entry tool into a genuine financial dashboard. Owners can visualise revenue trends, export reports for accountants, generate receipts, and eventually collect rent payments online.

Revenue Analytics

- ★ Monthly revenue bar chart (total collected)
- ★ Revenue breakdown by property
- ★ Category split: Rent vs Water vs Repair
- ★ Occupancy trend over time
- ★ Cash flow forecast (expected vs received)
- ★ Real trend % on dashboard stat cards

Export & Document Generation

- ★ Export transactions to CSV
- ★ PDF receipt per transaction (on-device)
- ★ Monthly statement PDF per property
- ★ Owner company name + logo on receipts

Lease Management

- ★ Lease start/end dates per unit
- ★ Monthly rent amount stored on unit
- ★ Vacancy calendar per property
- ★ Auto-generate monthly rent transactions via pg_cron
- ★ Move-in / move-out checklist per unit
- ★ Digital lease e-signature (Dropbox Sign)

Online Payment Collection

- ★ Tenant pays rent from app (Stripe / Pystack)
- ★ Transaction auto-flips to PAID on success
- ★ Payment receipt emailed automatically
- ★ Owner sees payment in dashboard instantly

New Services Introduced in Phase 3

Service	Purpose	Free Tier	Paid
Stripe	Online rent collection (international)	—	2.9% + \$0.30/transaction
Paystack	Online rent collection (African markets)	—	1.5% capped ~\$4.50
react-native-html-to-pdf	On-device PDF receipt generation	Free (open source)	—
Dropbox Sign (HelloSign)	Digital lease e-signatures	3 signatures/month	\$15/month unlimited
Cloudinary	Image CDN + auto-resize for property photos	25 GB storage + 25 GB bandwidth	\$89/month for 225 GB

PHASE 4

Tenant Portal — Self-Service & Maintenance Requests

Future

Opens a lightweight read-only portal for tenants. The Supabase RLS model already supports it — `profiles.role = 'tenant'` rows exist. This phase adds the tenant-facing navigation and screens. Reduces "how much do I owe?" messages significantly.

- ★ Tenant login → tenant-scoped dashboard
- ★ Payment history for tenant's unit
- ★ Submit maintenance request with photo
- ★ Chat with owner
- ★ Update personal contact details
- ★ View current balance and due dates
- ★ Pay rent online (Stripe / Pystack)
- ★ Track maintenance request status
- ★ View and download lease / receipts
- ★ Push notifications for owner messages

Note: The tenant portal reuses the same Supabase project, Edge Functions, and push notification infrastructure from Phases 2–3. The primary engineering work is adding tenant-scoped navigation and ensuring RLS policies correctly restrict data to each tenant's unit.

New Services in Phase 4

Service	Purpose	Cost
TransUnion SmartMove	Tenant background + credit check (tenant pays)	\$25–\$40/check (paid by tenant)

Production & Growth — Store Release, CI, Analytics

Future

Ships VersaRent to the App Store and Google Play, adds error monitoring, product analytics, and a light theme. Positions the app for real user growth.

- ★ EAS Build profiles (iOS + Android)
 - ★ CI pipeline: lint, typecheck, EAS build
 - ★ Product analytics (PostHog)
 - ★ Rate limiting on messages (Edge Function)
 - ★ Onboarding checklist for new owners
 - ★ Deep linking between views
- ★ App Store + Google Play submission
 - ★ Crash + error monitoring (Sentry)
 - ★ Supabase App Check (API abuse prevention)
 - ★ Light theme toggle
 - ★ Delete account flow
 - ★ Workflow automation via Zapier/pg_cron

New Services in Phase 5

Service	Purpose	Free Tier	Paid
Sentry	Crash & error tracking	5,000 errors/month	\$26/month for 50k
PostHog	Product analytics, feature flags	1M events/month	\$0.00045/event after
EAS Build (Expo)	iOS + Android builds for store	Free tier available	\$99/month Production
Zapier	Workflow automation (Supabase → Slack/Sheets)	100 tasks/month	\$20/month Starter

03

Master Priority Backlog

All features across all phases ranked by impact and dependency order. Tackle items in order within each priority level.

#	Feature	Phase	Priority	Services	Cost
1	Assign / unassign client to unit UI	1	P0	Supabase	Free
2	Add / edit / delete units on property	1	P0	Supabase	Free
3	Cascade delete units + transactions	1	P0	Supabase	Free
4	Edit property details	1	P0	Supabase	Free
5	Edit / delete transaction	1	P0	Supabase	Free
6	Supabase Storage — property photos + avatars	1	P0	Supabase Storage	Free (1 GB)
7	Pull-to-refresh + loading skeletons	0	P1	—	Free
8	Bottom tab bar navigation	0	P1	—	Free
9	WhatsApp deep link reminder button	2	P1	None (Linking API)	Free
10	In-app quick-reply reminder in chat	2	P1	Supabase	Free
11	Transaction filter + search + CSV export	1	P1	—	Free
12		1	P1	Supabase Realtime	Free

#	Feature	Phase	Priority	Services	Cost
	Unread message badge + last message preview				
13	Expo push notifications (manual trigger)	2	P1	Expo Push API	Free
14	In-app notification centre + bell badge	2	P1	Supabase Realtime	Free
15	pg_cron: auto OVERDUE + auto remind (3 days)	2	P1	pg_cron (Supabase)	Free
16	Maintenance schedule tracker	2	P1	Supabase + pg_cron	Free
17	Email reminder via Resend	2	P2	Resend	Free ≤ 3k/mo
18	SMS reminder via Twilio	2	P2	Twilio	~\$0.008/SMS
19	Lease expiry alerts via pg_cron	2	P2	pg_cron + Expo Push	Free
20	Tenant maintenance request → owner push	2	P2	Supabase Webhook	Free
21	Revenue charts + real trend percentages	3	P2	—	Free
22	PDF receipt (on-device)	3	P2	react-native-html-to-pdf	Free
23	Lease start/end dates + auto rent generation	3	P2	pg_cron	Free
24	Sentry error monitoring	5	P2	Sentry	Free ≤ 5k errors
25	Stripe / Payscale payment gateway	3	P3	Stripe or Payscale	% per transaction
26	Digital lease e-signatures	3	P3	Dropbox Sign	\$15/month

#	Feature	Phase	Priority	Services	Cost
27	Tenant self-service portal	4	P3	Supabase RLS	Free
28	EAS Build + app store submission	5	P3	EAS Build	\$99/month
29	PostHog product analytics	5	P3	PostHog	Free ≤ 1M events
30	Tenant background check (SmartMove)	4	P3	TransUnion SmartMove	\$25-40/check

Third-Party Services — Full Reference

All external services used across phases, organised by function. Items marked **Free** have meaningful free tiers sufficient for early-stage use.

Notifications & Messaging

Service	Purpose	Free Tier	Paid Tier	Phase
Expo Push Notifications	Native mobile push	Unlimited	—	2
Resend	Transactional email (reminders, receipts)	3,000/month	\$20/mo · 50k	2
Twilio SMS	SMS rent reminders	—	\$0.0079/SMS	2
WhatsApp deep link	Pre-filled WhatsApp reminder (no API)	Free (device)	—	2

Payments

Service	Purpose	Market	Fee	Phase
Stripe	Online rent collection	International	2.9% + \$0.30	3
Paystack	Online rent collection	Africa (NG, GH, KE)	1.5%, capped ~\$4.50	3
Flutterwave	Multi-currency payments	Pan-African	1.4% local · 3.8% intl	3

Storage & Media

Service	Purpose	Free Tier	Paid Tier	Phase
Supabase Storage	Property photos, avatars, documents	1 GB	\$0.021/GB	1

Service	Purpose	Free Tier	Paid Tier	Phase
Cloudinary	Image CDN + auto-resize	25 GB storage + BW	\$89/month	3

Document Generation & Signing

Service	Purpose	Free Tier	Paid Tier	Phase
react-native-html-to-pdf	On-device PDF receipt generation	Free (open source)	—	3
Dropbox Sign	Digital lease e-signatures	3 signatures/month	\$15/month unlimited	3
PandaDoc	Document templates + e-sign	Unlimited e-sign (free plan)	\$19/month	3

Monitoring, Analytics & DevOps

Service	Purpose	Free Tier	Paid Tier	Phase
Sentry	Crash & error tracking	5,000 errors/month	\$26/month	5
PostHog	Product analytics + feature flags	1M events/month	\$0.00045/event	5
EAS Build (Expo)	iOS + Android production builds	Free tier (limited)	\$99/month Production	5
Zapier	Workflow automation	100 tasks/month	\$20/month Starter	5

Tenant Screening

Service	Purpose	Who Pays	Cost per Check	Phase
TransUnion SmartMove	Credit + background check	Tenant	\$25–\$40	4
Checkr	Background check	Owner	\$29.99+	4
