VersaRent

Dual-Sided Property Management Platform — Landlord & Tenant Experience · Phased Roadmap & Third-Party Integration Guide

LANDLORD SIDE

Property Owner

CLIENT SIDE

Tenant Portal

Platform: Expo SDK 56 · React Native · TypeScript

Backend: Supabase (Auth · PostgreSQL · Realtime · Storage · Edge Functions · pg_cron)

Phases: 0 – 6 (Foundation → Tenant Portal → Growth)

Last updated: June 28, 2026

01 Product Overview

VersaRent is a dual-sided property management platform. The **Landlord side** (currently built) gives a property owner a full dashboard to manage their portfolio. The **Tenant/Client side** (roadmapped) gives each tenant a self-service portal to pay rent, submit maintenance requests, and communicate with their landlord — all in the same app, separated by role.

Landlord / Owner Side

One authenticated owner manages multiple properties, units, tenants, and the transaction ledger. The dashboard provides portfolio-wide stats, occupancy rates, revenue tracking, messaging, and maintenance oversight. Every data access is scoped by Row Level Security to the signed-in owner.

Tenant / Client Side

Each tenant gets a focused, read-only (then interactive) view of their own unit: current balance, payment history, upcoming due dates, maintenance request submission and tracking, lease details, and direct chat with their landlord. Tenants exist as `profiles.role = 'tenant'` records linked to a unit.

Current Technology Stack

Layer	Technology	Used By
Mobile client	Expo SDK 56 · React Native · TypeScript	Both sides
Auth	Supabase Auth — Email, Google, Facebook, Twitch OAuth	Both sides
Database	Supabase PostgreSQL + Row Level Security	Both sides
Realtime	Supabase Realtime (live chat, notifications)	Both sides
Storage	Supabase Storage (photos, documents)	Both sides
Automation	pg_cron + Supabase Edge Functions + DB Webhooks	Landlord-driven
Build	EAS Build (planned)	Both sides

Role Routing Logic

profiles.role	Experience loaded	Nav items
'owner'	Landlord dashboard (current)	Overview, Properties, Clients, Transactions, Messages, Profile

profiles.role	Experience loaded	Nav items
'tenant'	Tenant portal (Phase 4)	My Unit, Pay Rent, Maintenance, Messages, Profile

Data Model — Shared Tables

Table	Purpose	New Columns Needed
profiles	Extends auth.users; role, contact info	expo_push_token, company_name, company_logo_url
properties	Buildings owned by owner_id	—
units	Rentable spaces; tenant_id links to tenant profile	lease_start, lease_end, monthly_rent, move_in_checklist (jsonb)
transactions	Rent, water, repair charges per unit	receipt_url, paid_at
messages	Owner ↔ tenant chat	—
maintenance_requests	Tenant-submitted issues (new)	unit_id, title, description, priority, status, photo_url, resolved_at
maintenance_schedules	Owner-planned recurring tasks (new)	property_id, title, recurrence, next_due_date, last_completed_date
notifications	In-app alert centre for both roles (new)	recipient_id, role, type, title, body, read, related_id
announcements	Owner broadcasts to all unit tenants (new)	property_id, owner_id, title, body, created_at

Development Phases

Phase	Name	Focus	Sides	Status
0	Foundation	Core landlord CRUD, auth, dashboard	Landlord	In Progress
1	Core Gaps	Unit mgmt, client assign, transaction CRUD, image upload	Landlord	Next
2	Reminders & Alerts	Payment pings, maintenance alerts, push, SMS, WhatsApp	Both	Planned
3	Financial & Reporting	Charts, exports, lease tracking, payment gateway	Both	Planned
4	Tenant Portal	Full tenant-side experience, maintenance requests, online payment	Tenant	Future
5	Community & Engagement	Announcements, ratings, visitor mgmt, package tracking	Both	Future
6	Production & Growth	EAS Build, CI, Sentry, PostHog, app store submission	Both	Future

Foundation — Core App (In Progress)

All items currently built and working for the landlord side. Phase 0 closes remaining PARTIAL items before moving forward.

LANDLORD — DONE

- ✓ Email, Google, Facebook, Twitch sign-in
- ✓ Auto owner role + profile bootstrap
- ✓ Dashboard: stat cards, property gallery
- ✓ Properties list + add modal with image presets
- ✓ Transactions ledger + add transaction modal
- ✓ Realtime owner ↔ client chat
- ✓ Owner profile: name, phone, bio
- ✓ Row Level Security on all tables
- ✓ Dark theme + branded UI primitives
- ⚠ Trend % on stat cards (static → real)
- Pull-to-refresh + loading skeletons
- Bottom tab bar navigation

TENANT — PHASE 0 PREP

- ✓ profiles.role = 'tenant' column exists in DB
- ✓ RLS policies allow tenant data isolation
- ✓ units.tenant_id FK to profiles exists
- ✓ messages table supports owner ↔ tenant chat
- Role-based nav routing (owner vs tenant)
- Tenant login screen (same auth, different nav)
- Seed sample tenant profiles linked to units

No new services required. Phase 0 uses only the existing Supabase stack. The tenant-side prep items are schema + routing groundwork done alongside landlord work.

Core Gaps — Full CRUD & Client Management

Next Up

Closes all major missing functionality that makes VersaRent unusable on real data.
Also sets up the invite flow that lets tenants receive access to the app for the first time.

LANDLORD FEATURES

- Add / edit / delete units from property detail
- Cascade delete units + transactions on property delete
- Assign / unassign tenant to unit (set tenant_id)
- Edit property details (name, address, type)
- Edit / delete transaction
- Filter + search transactions
- Export transactions to CSV
- Client detail view: name, phone, email, unit
- Unread badge + last message preview in chat list
- Supabase Storage: property photo upload
- Supabase Storage: owner avatar upload
- Delete account flow

TENANT — INVITE & ONBOARD

- ★ Owner sends invite link / email to tenant
- ★ Tenant signs up via invite → auto-assigned to unit
- ★ Tenant profile created with role = 'tenant'
- ★ Tenant sees correct nav (My Unit, Messages, Profile)
- ★ Tenant: view their unit details (number, property, floor)
- ★ Tenant: view current outstanding balance
- ★ Tenant: view payment history for their unit
- ★ Tenant: edit own profile (name, phone, bio)
- ★ Tenant avatar upload (Supabase Storage)
- ★ Tenant: chat with landlord (already built, just needs nav)

New Services in Phase 1

Service	Purpose	Used By	Cost
Supabase Storage	Photo + avatar upload	Both	Free (1 GB included)
Resend (invite emails)	Send tenant invite emails	Landlord triggers	Free ≤ 3,000/month

Reminders & Alerts — Payment Pings, Maintenance Notifications

Planned

LANDLORD — SENDING REMINDERS

- ★ Quick-reply "Send Reminder" button in chat (pre-fills outstanding amount + due date)
- ★ "Send via WhatsApp" button on tenant/transaction row (Linking API, no API key)
- ★ Trigger push notification to specific tenant manually
- ★ Trigger email reminder to tenant via Resend
- ★ Trigger SMS reminder to tenant via Twilio
- ★ Broadcast message to all tenants of a property
- ★ In-app notification centre (bell icon) for owner alerts
- ★ Maintenance schedule tracker (owner creates recurring tasks)
- ★ pg_cron: auto OVERDUE flag after due date passes
- ★ pg_cron: auto remind owner 3 days before rent due
- ★ pg_cron: lease expiry alert at 30 / 14 / 7 days
- ★ DB webhook: new maintenance request → push to owner instantly

TENANT — RECEIVING ALERTS

- ★ Push notification when owner sends payment reminder
- ★ Push notification when new message received from owner
- ★ Automatic push 3 days before rent due date
- ★ Automatic push + email on day rent is due
- ★ Push + email when transaction flipped to OVERDUE
- ★ Push when maintenance request status changes (owner updates it)
- ★ Push when owner sends a property-wide broadcast
- ★ In-app notification centre (bell icon) for tenant alerts
- ★ SMS reminder to tenant's phone (owner triggers or automated)
- ★ Email reminder with payment details and due date
- ★ Lease expiry reminder: "Your lease ends in 30 days"

Reminder Channel Summary

In-App Chat Shortcut

Free

Quick-reply button pre-fills a payment reminder with the tenant's outstanding amount and due date. Zero new infrastructure — writes to the existing messages table.

WhatsApp Deep Link

Free

Opens native WhatsApp with a pre-filled message using `Linking.openURL('https://wa.me/...')`. No API key required. Works in Expo Go today.

Push Notification

Free

Expo Push API sends native push to tenant or owner device. Stores expo_push_token in profiles. Called from Supabase Edge Function. Tenant also sends push back when submitting maintenance request.

Email Reminder

Free ≤ 3k/mo

Branded HTML email via Resend. Shows tenant name, unit, property, amount, due date, and optional personal note from owner. Tenant receives; owner can view delivery status.

SMS via Twilio

~\$0.008/SMS

Edge Function reads tenant phone from profiles and sends SMS. Credentials stored as Supabase secrets. Owner triggers manually or via scheduled pg_cron job.

Scheduled (pg_cron)

Free

Daily cron at 8 AM: finds due-soon transactions → triggers push + email. Auto-flips PENDING to OVERDUE after due date. Weekly: lease expiry check. Monthly: generate rent transaction rows.

New Services in Phase 2

Service	Purpose	Used By	Free Tier	Paid
Expo Push Notifications	Native push (both directions)	Both	Unlimited	—
Resend	Email reminders + receipts	Landlord triggers → tenant receives	3,000/month	\$20/mo · 50k
Twilio SMS	SMS rent reminders	Landlord triggers → tenant receives	—	\$0.0079/SMS
pg_cron	Scheduled auto-reminders + OVERDUE flagging	System (benefits both)	Included in Supabase	—
Supabase DB Webhooks	Trigger Edge Functions on table events	System	Included in Supabase	—

Financial & Reporting — Analytics, Exports, Online Payments

Planned

LANDLORD — FINANCIAL TOOLS

- ★ Monthly revenue bar chart per property
- ★ Category split: Rent vs Water vs Repair
- ★ Occupancy trend over time
- ★ Cash flow forecast (expected vs received)
- ★ Real trend % on dashboard stat cards
- ★ Export all transactions to CSV
- ★ Monthly PDF statement per property
- ★ Company name + logo on reports and receipts
- ★ Lease start/end dates + monthly rent stored per unit
- ★ Vacancy calendar showing free units by date range
- ★ Auto-generate monthly rent transactions via pg_cron
- ★ Digital lease e-signature (Dropbox Sign)
- ★ Move-in / move-out checklist per unit (jsonb)

TENANT — FINANCIAL SELF-SERVICE

- ★ Pay rent online in-app (Stripe / Paystack)
- ★ Transaction auto-marked PAID on successful payment
- ★ Receipt emailed automatically after payment (Resend)
- ★ View and download PDF receipts for past payments
- ★ View total owed vs total paid (own unit only)
- ★ View current lease details: start, end, monthly rent
- ★ Lease expiry countdown on My Unit screen
- ★ View and sign digital lease agreement (Dropbox Sign)
- ★ Download signed lease PDF from app
- ★ Move-in checklist: tenant confirms condition on move-in
- ★ Payment history chart (bar chart, own unit, last 12 months)

New Services in Phase 3

Service	Purpose	Used By	Free Tier	Paid
Stripe	Online rent payment (international)	Tenant pays, Landlord receives	—	2.9% + \$0.30/txn
Paystack	Online rent payment (Africa)	Tenant pays, Landlord receives	—	1.5%, capped ~\$4.50

Service	Purpose	Used By	Free Tier	Paid
react-native-html-to-pdf	On-device PDF receipt generation	Both (landlord reports, tenant receipts)	Free (open source)	—
Dropbox Sign	Digital lease e-signatures	Landlord sends → Tenant signs	3 sigs/month	\$15/mo unlimited
Cloudinary	Image CDN + auto-resize for property photos	Both sides see faster images	25 GB storage + BW	\$89/mo (225 GB)

Tenant Portal — Full Self-Service Experience & Maintenance Requests

Future

Phase 4 completes the tenant side of the app into a first-class experience. The Supabase RLS model already enforces tenant data isolation — this phase adds the full tenant-facing screens and workflows that make the app genuinely useful for both parties.

LANDLORD — MAINTENANCE OVERSIGHT

- ★ Work Orders view: all open maintenance requests across portfolio
- ★ Triage requests: set priority (low / medium / urgent)
- ★ Update request status: Open → In Progress → Resolved
- ★ Add resolution notes visible to tenant
- ★ Vendor / contractor directory (name, phone, trade)
- ★ Attach cost to resolved request → auto-create REPAIR transaction
- ★ Tenant screening: send SmartMove link from client profile
- ★ Property inspection scheduling (calendar slot per unit)
- ★ Inspection notes + photos stored per unit
- ★ Landlord-side maintenance schedule alerts (pg_cron)

TENANT — FULL SELF-SERVICE

- ★ My Unit screen: unit number, property, floor, lease dates
- ★ Current balance widget: amount owed + due date
- ★ Pay rent button → Stripe / Paystack checkout sheet
- ★ Full payment history with receipt download
- ★ Submit maintenance request (title, description, photo, priority)
- ★ Track request status: Open → In Progress → Resolved
- ★ View resolution notes from landlord
- ★ Rate completed maintenance work (1–5 stars)
- ★ Emergency contact info (landlord phone, building manager)
- ★ View and download signed lease PDF
- ★ Move-in checklist: confirm unit condition with photos
- ★ Upcoming inspection notification (date + time)

New Services in Phase 4

Service	Purpose	Who Uses It	Cost
TransUnion SmartMove	Tenant background + credit check	Landlord sends link; tenant completes + pays	\$25–\$40/check (tenant pays)

Service	Purpose	Who Uses It	Cost
Checkr	Background check (owner pays)	Landlord initiates	\$29.99+/check

Community & Engagement — Announcements, Ratings, Visitor Management

Future

LANDLORD — COMMUNITY TOOLS

- ★ Post announcements to all tenants of a property
- ★ Pin important announcements (e.g. water shutoff notice)
- ★ View maintenance ratings from tenants (aggregate score)
- ★ Approve / reject tenant visitor passes
- ★ Package delivery tracking per unit (log item received)
- ★ Parking bay assignment per unit
- ★ Utility bill upload + allocate per unit
- ★ AI rent price suggestion (based on unit size, location)

TENANT — COMMUNITY & CONVENIENCE

- ★ View property-wide announcements (pinned + feed)
- ★ Push notification on new announcement
- ★ Request visitor pass (guest name, date, time)
- ★ View approved visitor passes history
- ★ Package delivery alert: "A package arrived for Unit 3B"
- ★ View assigned parking bay number
- ★ View utility bills allocated to their unit
- ★ Rate completed maintenance (1–5 stars + comment)

Community features significantly increase daily active usage for tenants — they open the app even when rent is not due, which improves push notification opt-in rates and reduces communication friction between landlord and tenants.

Production & Growth — Store Release, CI, Error Tracking, Analytics

Future

LANDLORD — PRODUCTION

- ★ EAS Build profiles (iOS + Android)
- ★ App Store + Google Play submission
- ★ CI pipeline: lint, typecheck, EAS build
- ★ Sentry crash + error monitoring
- ★ PostHog: which features owners use most
- ★ Supabase App Check (API abuse prevention)
- ★ Rate limiting on messages (Edge Function)
- ★ Light theme toggle
- ★ Onboarding checklist for new landlords

TENANT — PRODUCTION

- ★ Sentry error tracking (same project, tenant sessions)
- ★ PostHog: tenant feature usage analytics
- ★ Light theme toggle
- ★ Onboarding tour for new tenants (first login)
- ★ Deep linking: notification → correct screen
- ★ Offline mode: cached balance + transaction list
- ★ Biometric login (Face ID / fingerprint)

New Services in Phase 6

Service	Purpose	Used By	Free Tier	Paid
Sentry	Crash + error tracking	Both	5,000 errors/month	\$26/month
PostHog	Product analytics + feature flags	Both	1M events/month	\$0.00045/event
EAS Build	iOS + Android production builds	Both	Free tier (limited)	\$99/month Production
expo-local-authentication	Face ID / fingerprint login	Both	Free (Expo library)	—

Master Priority Backlog

All features across all phases, ranked in execution order. L = Landlord only T = Tenant only B = Both sides

#	Feature	Ph	Side	Priority	Cost
1	Assign / unassign tenant to unit UI	1	L	P0	Free
2	Add / edit / delete units from property	1	L	P0	Free
3	Cascade delete units + transactions	1	L	P0	Free
4	Edit property details	1	L	P0	Free
5	Edit / delete transaction	1	L	P0	Free
6	Role-based nav routing (owner vs tenant app)	0	B	P0	Free
7	Tenant invite flow (email → sign-up → unit assigned)	1	B	P0	Free (Resend)
8	Tenant: My Unit screen (balance, due date, unit info)	1	T	P0	Free
9	Supabase Storage for property photos + avatars	1	B	P0	Free (1 GB)
10	Pull-to-refresh + loading skeletons	0	B	P1	Free

#	Feature	Ph	Side	Priority	Cost
40	Biometric login (Face ID / fingerprint)	6	B	P3	Free

Third-Party Services — Full Reference

Notifications & Messaging

Service	Purpose	Used By	Free Tier	Paid	Phase
Expo Push	Native push (landlord reminders → tenant; tenant maintenance → landlord)	Both	Unlimited	—	2
Resend	Email reminders, receipts, tenant invites	L triggers → T receives	3,000/month	\$20/mo · 50k	1–3
Twilio SMS	SMS rent reminders to tenant phone	L triggers → T receives	—	\$0.0079/SMS	2
WhatsApp deep link	Pre-filled WhatsApp message (no API)	Landlord sends	Free (device)	—	2

Payments

Service	Purpose	Flow	Fee	Phase
Stripe	Online rent collection (international)	Tenant pays → Landlord receives	2.9% + \$0.30	3
Paystack	Online rent collection (Africa)	Tenant pays → Landlord receives	1.5%, capped ~\$4.50	3
Flutterwave	Multi-currency (pan-African)	Tenant pays → Landlord receives	1.4% local · 3.8% intl	3

Storage, Media & Documents

Service	Purpose	Used By	Free Tier	Paid	Phase
Supabase Storage	Photos, avatars, documents	Both	1 GB	\$0.021/GB	1
Cloudinary	Image CDN + auto-resize	Both	25 GB + BW	\$89/month	3
		Both		—	3

Service	Purpose	Used By	Free Tier	Paid	Phase
react-native-html-to-pdf	On-device PDF receipts + reports		Free (open source)		
Dropbox Sign	Digital lease e-signatures	L sends → T signs	3 sigs/month	\$15/month	3

Automation & Scheduling

Service	Purpose	Benefits	Cost	Phase
pg_cron (Supabase)	Scheduled jobs: overdue flags, reminders, rent generation, lease expiry	Both sides	Included in Supabase	2–3
Supabase DB Webhooks	Trigger Edge Functions on table row changes	Both sides	Included in Supabase	2
Zapier	Workflow automation (Supabase → Slack / Google Sheets)	Landlord admin	100 tasks/month	\$20/month

Monitoring, Analytics & DevOps

Service	Purpose	Used By	Free Tier	Paid	Phase
Sentry	Crash + error tracking for both sides	Both	5,000 errors/month	\$26/month	6
PostHog	Product analytics + feature flags	Both	1M events/month	\$0.00045/event	6
EAS Build	iOS + Android production builds	Both	Free tier	\$99/month	6

Tenant Screening

Service	Purpose	Who Pays	Cost/Check	Phase
TransUnion SmartMove	Credit + background check	Tenant pays	\$25–\$40	4
Checkr	Background check	Landlord pays	\$29.99+	4
